

RECORDING TIPS

General Tips:

- ⚙️ Leave a few seconds of silence at the start and end of each recording.
- ⚙️ Talk with your mouth pointed at the mic!
- ⚙️ Don't talk and type at the same time!
- ⚙️ It's OK to talk while interacting with buttons/menus/etc, pointing at important things, or highlighting text.
- ⚙️ If you flub a line, you can just repeat it until you get it right, but leave a second of silence between attempts.
- ⚙️ If you want to rephrase a line say "Hey Editor, I'll rephrase that"

When you make a mistake (we all do!):

Step 1: Say *"Hey Editor, I messed something up..."*

Step 2: Once you've figured out what went wrong, add a note using blockquotes in the script, just before the part where you messed up. This can really help our video editors out! Leave messages like:

```
>I typed this next block of code wrong 5 times! Only  
include the 6th attempt, please.  
  
>I screwed up here, up until the part where I say "Oh look!  
We made a cat constant." You can cut everything out until  
after I say "I'm going to try that again"  
  
>Please just| cut out everything after this point and end  
the demo here. It ran too long and this bit isn't  
important.
```

Step 3: When you are ready to resume, say *"OK Editor, I'm going to take it again from (the line before you messed up)."*

If something goes horribly wrong, it's OK to stop the recording and just try again from the beginning.
