

DEMO RECORDING SETUP

SET UP AUDIO RECORDING GEAR

- ☐ Make your recording space as quiet as you can!
- ☐ Plug your mic into the Scarlett, and press the “48V” button to power the mic.
- ☐ Position the mic and pop filter as close to your mouth as you can, without them being in the way.
- ☐ The logo on the mic should be pointed at you. Only one side of the mic is designed to pick up sound.
- ☐ Check your levels!
 - ☐ Speak at your top volume and watch the flashing colored light on the Scarlett.
 - ☐ As you speak, turn the Gain knob up until you see orange, then turn it back down until you only see green.
- ☐ Make sure your recording software is set to use the Scarlett as the input device.
- ☐ Get a glass of water for yourself. You’ll need it :]
